New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Chess Openings

This volume aims to provide an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the 'Move by Move' format greatly encourages the learning and practicing of vital skills just as much as the traditional assimilation of opening knowledge. Selected questions and answers are designed to keep the reader actively involved and allow him to monitor his progress as he learn. This can be a good way to study any chess opening and at the same time improve general chess skills and knowledge. In this book, Cyrus Lakdawala examines the 'Caro-Kann' - he wants to share his experience and knowledge of the 'Caro-Kann', present a repertoire for Black and provide answers to all the key questions.

This book provides a rock solid opening repertoire for Black, using systems based on the move ...c6. The backbone of this repertoire is the Caro-Kann versus 1 e4 and the Semi-Slav (via a Slav move order) versus 1 d4. In general these systems aim to neutralise White's early initiative. They aim for success by the gradual accumulation of small advantages, rather than by emerging victorious from an early tactical melee (which is rather problematic with the black pieces at the best of times). The book is co-authored by Cyrus Lakdawala and Keaton Kiewra and takes a teacher/student format. The "student" Keaton Kiewra is a very strong international master with two grandmaster norms. He normally specialises in razor-sharp defences such as the Sicilian Dragon and King's Indian. Now he wants to broaden his style and develop his skills at handling more sedate positions. His "teacher" is Cyrus Lakdawala, an extremely experienced player, coach and author, who guides Keaton along the learning path.

Grandmaster Simon Williams has played the Classical Dutch for over twenty years. It remains his favourite opening and has featured in some of his greatest individual results, including a win over World Championship finalist Boris Gelfand. In this book, Williams examines the Classical Dutch in great depth. He also presents a complete repertoire for Black with the Dutch Defence, which is based on his own repertoire he has used successfully at grandmaster level for many years. As well as presenting the latest theory and revealing his new ideas in the key lines, Williams highlights the main tactical and strategic ideas for both sides and covers important issues such as move orders. Each chapter includes a series of tests at the end, so that readers are able to assess how well they have understood the main concepts. This books tells you everything you need to know about successfully playing the Classical Dutch. A Dutch repertoire against 1 d4, 1 c4 and 1 Nf3Written by a world-renowned Classical Dutch expert Packed with new ideas and critical analysis

Many chessplayers adopt an unnecessarily defensive approach when they have the black pieces. But not Grandmaster Adorjan, who claims that the reason many players rarely win with black is that they don't even try.

Chess Repertoire

Helps chess-players achieve a more holistic view of the openings

Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks â € " and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? Reducing Underage Drinking addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. Reducing Underage Drinking will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.

In chess, sacrificing material is the most dramatic way to try to seize the advantage. Most sacrifices have a forcing aim in mind, but most profound of all are positional sacrifices where the end is impossible to foresee and thus fine judgment, understanding and intuition are required. Such sacrifices are usually a mystery to average players, but acclaimed author and grandmaster Mihai Suba explains the secrets of this technique in entertaining fashion.
