Lord Rutherford has said that all science is either physics or stamp collecting. On that basis the study of forest biomass must be classified with stamp collecting and other such pleasurable pursuits. Japanese scientists have led the world, not only in collecting basic data, but in their attempts to systematise our knowledge of forest biomass. They have studied factors affecting dry matter production of forest trees in an attempt to approach underlying physical principles. This edition of Professor Satoo's book has been made possible the help of Dr John F. Hosner and the Virginia Poly technical Institute and State University who invited Dr Satoo to Blacksburg for three months in 1973 at about the time when he was in the final stages of preparing the Japanese version. Since then the explosion of world literature on forest biomass has continued to be fired by increasing shortages of timber supplies in many parts of the world as well as by a need to explore renewable sources of energy. In revising the original text I have attempted to maintain the input of Japanese work - much of which is not widely available outside Japan - and to update both the basic information and, where necessary, the conclusions to keep them in tune with current thinking. Those familiar with the Japanese original will find Chapter 3 largely rewritten on the basis of new work - much of which was initiated while Dr Satoo was in Blacksburg.

The Nordic Bioeconomy Programme presented in this document combines environmental, social and economic ambitions for a more sustainable Region. The bioeconomy is of fundamental importance to the national economies of the Nordic countries, and especially important for rural development in large parts of the Region. The programme aims to create new industries and value chains and to facilitate and guide the transition of bio-based industries into technology advanced industries, and to optimise the production and value creation of biomass. The programme sets out a vision for the Nordic bioeconomy based on four pillars: - competitive bio-based industries - sustainable resource management - resilient and diverse ecosystems - inclusive economic development To reach this vision, the programme defines 15 action points under three thematic areas: Innovate – Accelerate – Network. The focus is on development of new policies on regional, national and Nordic level, for increased funding, better education, labelling and certificates, bioeconomy clusters and several other areas. The programme also contains an appendix with sustainability principles that can be seen as a step towards developing common ground and good practices for a sustainable bioeconomy in the Nordic Region.

Fuels, Lubricants, Coolants, and Filters easily helps a reader to understand these wonderful liquids and filters better. By starting with the basics, it builds your knowledge step-by-step in a very structured manner.

A fun, interactive activity book based around the popular theme of magic to engage and motivate young learners. This book helps children to practise their grammar skills, reinforcing what has been taught at school. The books combine fun, magical characters and fantastic illustrations with National Curriculum- focused activities *Motivating activities based on the KS2 National Curriculum *Step-by-step learning introduced by fun characters *Includes gold stickers to reward achievement

Ford Madox Ford is a major figure of the modernist age, yet many of his works do not fulfil the expectations associated with the category of modernism. In Ford Madox Ford and the Misfit Moderns, the author examines the ways in which Ford, alongside other 'misfit moderns' (Richard Aldington, Arnold Bennett, Joseph Conrad, Robert Graves, Siegfried Sassoon, H. G. Wells, and Rebecca West), destabilises the fundamental structures and forces that shape all narratives, from the processes of characterisation and plotting to the distinction between autobiography and fiction. In so doing, Ford exhibits a form of 'in-betweenness' that constitutes an exemplary responsiveness to the conditions of modernity whilst challenging many of our assumptions about early twentieth-century writing. Offering original readings of Ford's Edwardian fiction and First World War writing, this book poses wide-ranging questions about the nature of narrative and the distinction between modernism and modernity. -- Book cover.

A 100-page, perfect-bound notebook, with neatly-lined interior pages. This is just one of many personalised notebooks from Silly Notebooks. If you want a notebook with a different name or animal on it, or if you have a photo you would like on the cover, or any other design for that matter, then please contact the team at Silly Notebooks. Unfortunately, I cannot place links on here to the Silly Notebooks website, where you can also have a look at some of the other notebooks available on Amazon, so you will need to do an Internet search for Silly Notebooks. Once you have found the site (which comes top on most popular search engines), please feel free to contact us with whatever ideas you have for your own personalised notebook and we will try to help. We do not charge for design and publishing, you only pay the price of the notebook on Amazon. We look forward to hearing from you.
