The argumentative result of this paper is that religion has a single authority, that is God and the prophet is his messenger sent to explain about religious authority. In this area the prophet as a human being helped explain and preach about the teachings of the religion commanded by God. Furthermore, the Prophet's role was replaced by his friends and until the scholars. At that time, religious transmission was traditional, because it was delivered directly without any media being used. The development of religion is supported by technological

developments, where at this time, technology is used by virtual clerics - such as cleric Hanan Attaki and cleric Khalid Basalamah - as a means of conveying religious teachings. Both of them read, construct meaning and convey it as a whole religious teaching. Although it must be recognized that there are areas that are difficult to distinguish when interpreting religious teachings, namely between the message expected by God or the Prophet as the holder of authority in religion and the message interpreted by both of these clerics. This hermeneutical region has been injured when someone interprets or gives meaning to religious teachings only with text instructions, because the text is only a basic guide in understanding the great message.

Provides a collection of teaching models that can be incorporated into a curriculum.

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Argues that international community can exist, and examines the possibilities for peaceful relations between states.

The Third Edition of this much celebrated textbook continues to focus on the four major and influential perspectives in contemporary social psychology - social cognition, social identity, social representations, and discursive psychology. A foundational chapter presenting an account of these perspectives is then followed by topic-based chapters from the point of view of each perspective in turn, discussing commonalities and divergences across each of them. Key Features of the Third Edition: - Now includes coverage of the social neuroscience paradigm and research on implicit social cognition - Updated pedagogical features and visual material - An extended conclusion covers the ways in which the different approaches of the field intersect as well as a general discussion of the direction in which the field is moving. Social Cognition: An Integrated Introduction is an integrative, holistic textbook that will enhance the reader's understanding of social cognition and of each of the topical issues considered. It remains a key textbook for psychology students, particularly those on courses in social psychology and social cognition.

This book brings together a group of internationally-reputed authors in the field of digital literacy. Their essays explore a diverse range of the concepts, policies and practices of digital literacy, and discuss how digital literacy is related to similar ideas: information

literacy, computer literacy, media literacy, functional literacy and digital competence. It is argued that in light of this diversity and complexity, it is useful to think of digital literacies - the plural as well the singular. The first part of the book presents a rich mix of conceptual and policy perspectives; in the second part contributors explore social practices of digital remixing, blogging, online trading and social networking, and consider some legal issues associated with digital media.

Cosmetic science covers the fields from natural sciences to human and social sciences, and is an important interdisciplinary element in various scientific disciplines. *New Cosmetic Science* is a completely updated comprehensive review of its 35 year old counterpart *Cosmetic Science*. *New Cosmetic Science* has been written to give as many people as possible a better understanding of the subject, from scientists and technologists specializing in cosmetic research and manufacturing, to students of cosmetic science, and people with a wide range of interests concerning cosmetics. The relationship between the various disciplines comprising cosmetic science, and cosmetics, is described in Part I. In addition to discussing the safety of cosmetics, the "Usefulness of Cosmetics", rapidly becoming an important theme, is described using research examples. The latest findings on cosmetic stability are presented, as are databases, books and magazines, increasingly used by cosmetic scientists. Part II deals with cosmetics from a usage viewpoint, including skin care cosmetics, makeup cosmetics, hair care cosmetics, fragrances, body cosmetics, and oral care cosmetics. Oral care cosmetics and body cosmetics are presented with product performance, types, main components, prescriptions and manufacturing methods described for each item. This excellent volume enlightens the reader not only on current cosmetics and usage, but indicates future progress enlarging the beneficial effects of cosmetics. Products with better pharmaceutical properties (cosmeceuticals), working both physically and psychologically, are also highlighted.
