Exposure**

Manual exposure of  
your photographs is  
not so complicated.  
All you need to do is  
manage the  
relationship between

the three exposure settings. The relationship between aperture settings, exposure, and depth of field is plain to see on this cheat sheet. How your choice of shutter speed affects both exposure and blurring is also well illustrated.

In manual exposure mode, if you point a spot meter at any object and dial the exposure so the meter indicator registers zero, you've made that object a middle tone, regardless of its actual brightness; dial the exposure to +1

and you've made the object one stop brighter than a middle tone, -1 and it's one stop darker than a middle tone, and so on.
