Valerie Bertinelli, then: bubbly sitcom star and America's Sweetheart turned tabloid headline and rock star wife. Now: actress, single working mother of teenage rock star, and weight-loss inspiration to millions. We all knew and loved Valerie Bertinelli years ago when she played girl-next-door cutie Barbara Cooper in the hit TV show One Day at a Time, and then starred in numerous TV movies. From wholesome primetime in America's living rooms, Valerie moved to late nights with the hardest-partying band of the decadent eighties when she became, at twenty, wife to rock guitarist Eddie Van Halen. Losing It is Valerie's frank account of her life backstage and in the spotlight. Here are the ups and downs of teen stardom, of her complicated marriage to a brilliant, tormented musical genius, and of her very public struggle with her weight. Surprising, uplifting, and empowering, Losing It takes you behind the scenes of Valerie's acting career and marriage, recalling the comforts, friendships, and problems of her television family, her close relationships with her parents and brothers, the stress and worries of being the wife of a rock star, and the joys of motherhood. Like many women, Valerie often remembers the state of her life by the food she ate and the numbers on her scale. So despite her celebrity, Valerie's voice is so down-to-earth, honest, and appealing that you'll feel as if you're talking with a girlfriend over coffee. Funny and candid, Valerie recounts her attempts to maintain a healthy self-image while dealing with social pressures to look and act a certain way, and to overcome career insecurities and relationship problems, all of which will be familiar to the hundreds of thousands of women who struggle every day with these same issues. From marital turmoil to the joys of a new career, from being named among Penthouse's ten sexiest women in the world to overhearing whispers about her weight gain in the grocery store, this is Valerie's inspiring journey as she finds new love, raises a terrific kid, and motivates other women as a spokesperson for Jenny Craig.

Today, herbicide-resistant weeds dominate research and development efforts in the discipline of weed science. The incidence, management challenges, and cost of multiple herbicide-resistant weed populations are continually increasing worldwide. Crop varieties with multiple herbicide-resistance traits are being rapidly adopted by growers and land managers to keep ahead of the weed resistance tsunami. This Special Issue of Plants comprises papers that describe the current status and future outlook of herbicide resistance research and development in weedy and domestic plants, with topics covering the full spectrum from resistance mechanisms to resistance management. The unifying framework for this Special issue is the challenge posed to all of the contributing authors: What are the (potential) implications for herbicide resistance management?

In this exciting and challenging work, Norman Long brings together years of work and thought in development studies to provide a key text for guiding future development research and practice. Using case studies and empirical material from Africa and Latin America, Development Sociology focuses on the theoretical and methodological foundations of an actor-oriented and social constructionist form of analysis. This style of analysis is opposed to the traditional structuralist/institutional analysis which is often applied in development studies. With an accessible mix of general debate, critical literature reviews and original case study materials this work covers a variety of key development issues. Among many important topics discussed, the author looks at commoditisation, small-scale enterprise and social capital, knowledge interfaces, networks and power, globalisation and localisation as well as policy formulation and planned intervention processes. This book should be read for its desire to pursue a form of analysis that helps us to understand better (and more realistically) the kinds of development interventions and social transformations that have characterised the second half of the twentieth century and will no doubt continue to characterise future development studies.
